## VARIABLE MESSAGE BOARDS

### SMC 1000 ST THREE-LINE

#### STANDARD FEATURES

- On-board dedicated NTCIP-compliant controller
- 5 LEDs per pixel provide uniform light output
- Energy-efficient LED display provides minimal battery maintenance and long operational life
- Automatic intensity control provides optimum LED intensity
- Industrial-grade trailer provides stable platform
- Powder-coat paint for improved fade and scratch resistance
- Automotive-grade connectors

### SMC 4000 MAST-MINI FULL MATRIX

#### STANDARD FEATURES

- On-board dedicated NTCIP controller provides easy programming with secure password protection
- Energy-efficient LED display provides minimal battery maintenance and long operational life
- Automatic intensity control provides optimum LED intensity
- Industrial-grade trailer provides stable platform
- 4 leveling jacks with slide-out extensions provide stability when deployed
- Powder-coat paint for improved fade and scratch resistance
- Calendar programming capability
- Full Matrix display (4' x 8') provides graphic messages and arrow board capability

## PORTABLE TRAFFIC SIGNALS

### RCF 2.4 AUTOMATED FLAGGER ASSISTANCE DEVICE

#### SINGLE-HEAD WITH GATE-ARM DESIGN FOR SHORT-TERM FLAGGING NEEDS.

The RCF 2.4 Automated Flagger Assistance Device is designed to be operated by a Traffic Control Person via remote control, from a safe location. One flag-person can control one or two units in work zones up to 800 feet long, or two flaggers can operate two units in work zones.

### PTL 2.4LD PORTABLE TRAFFIC SIGNAL

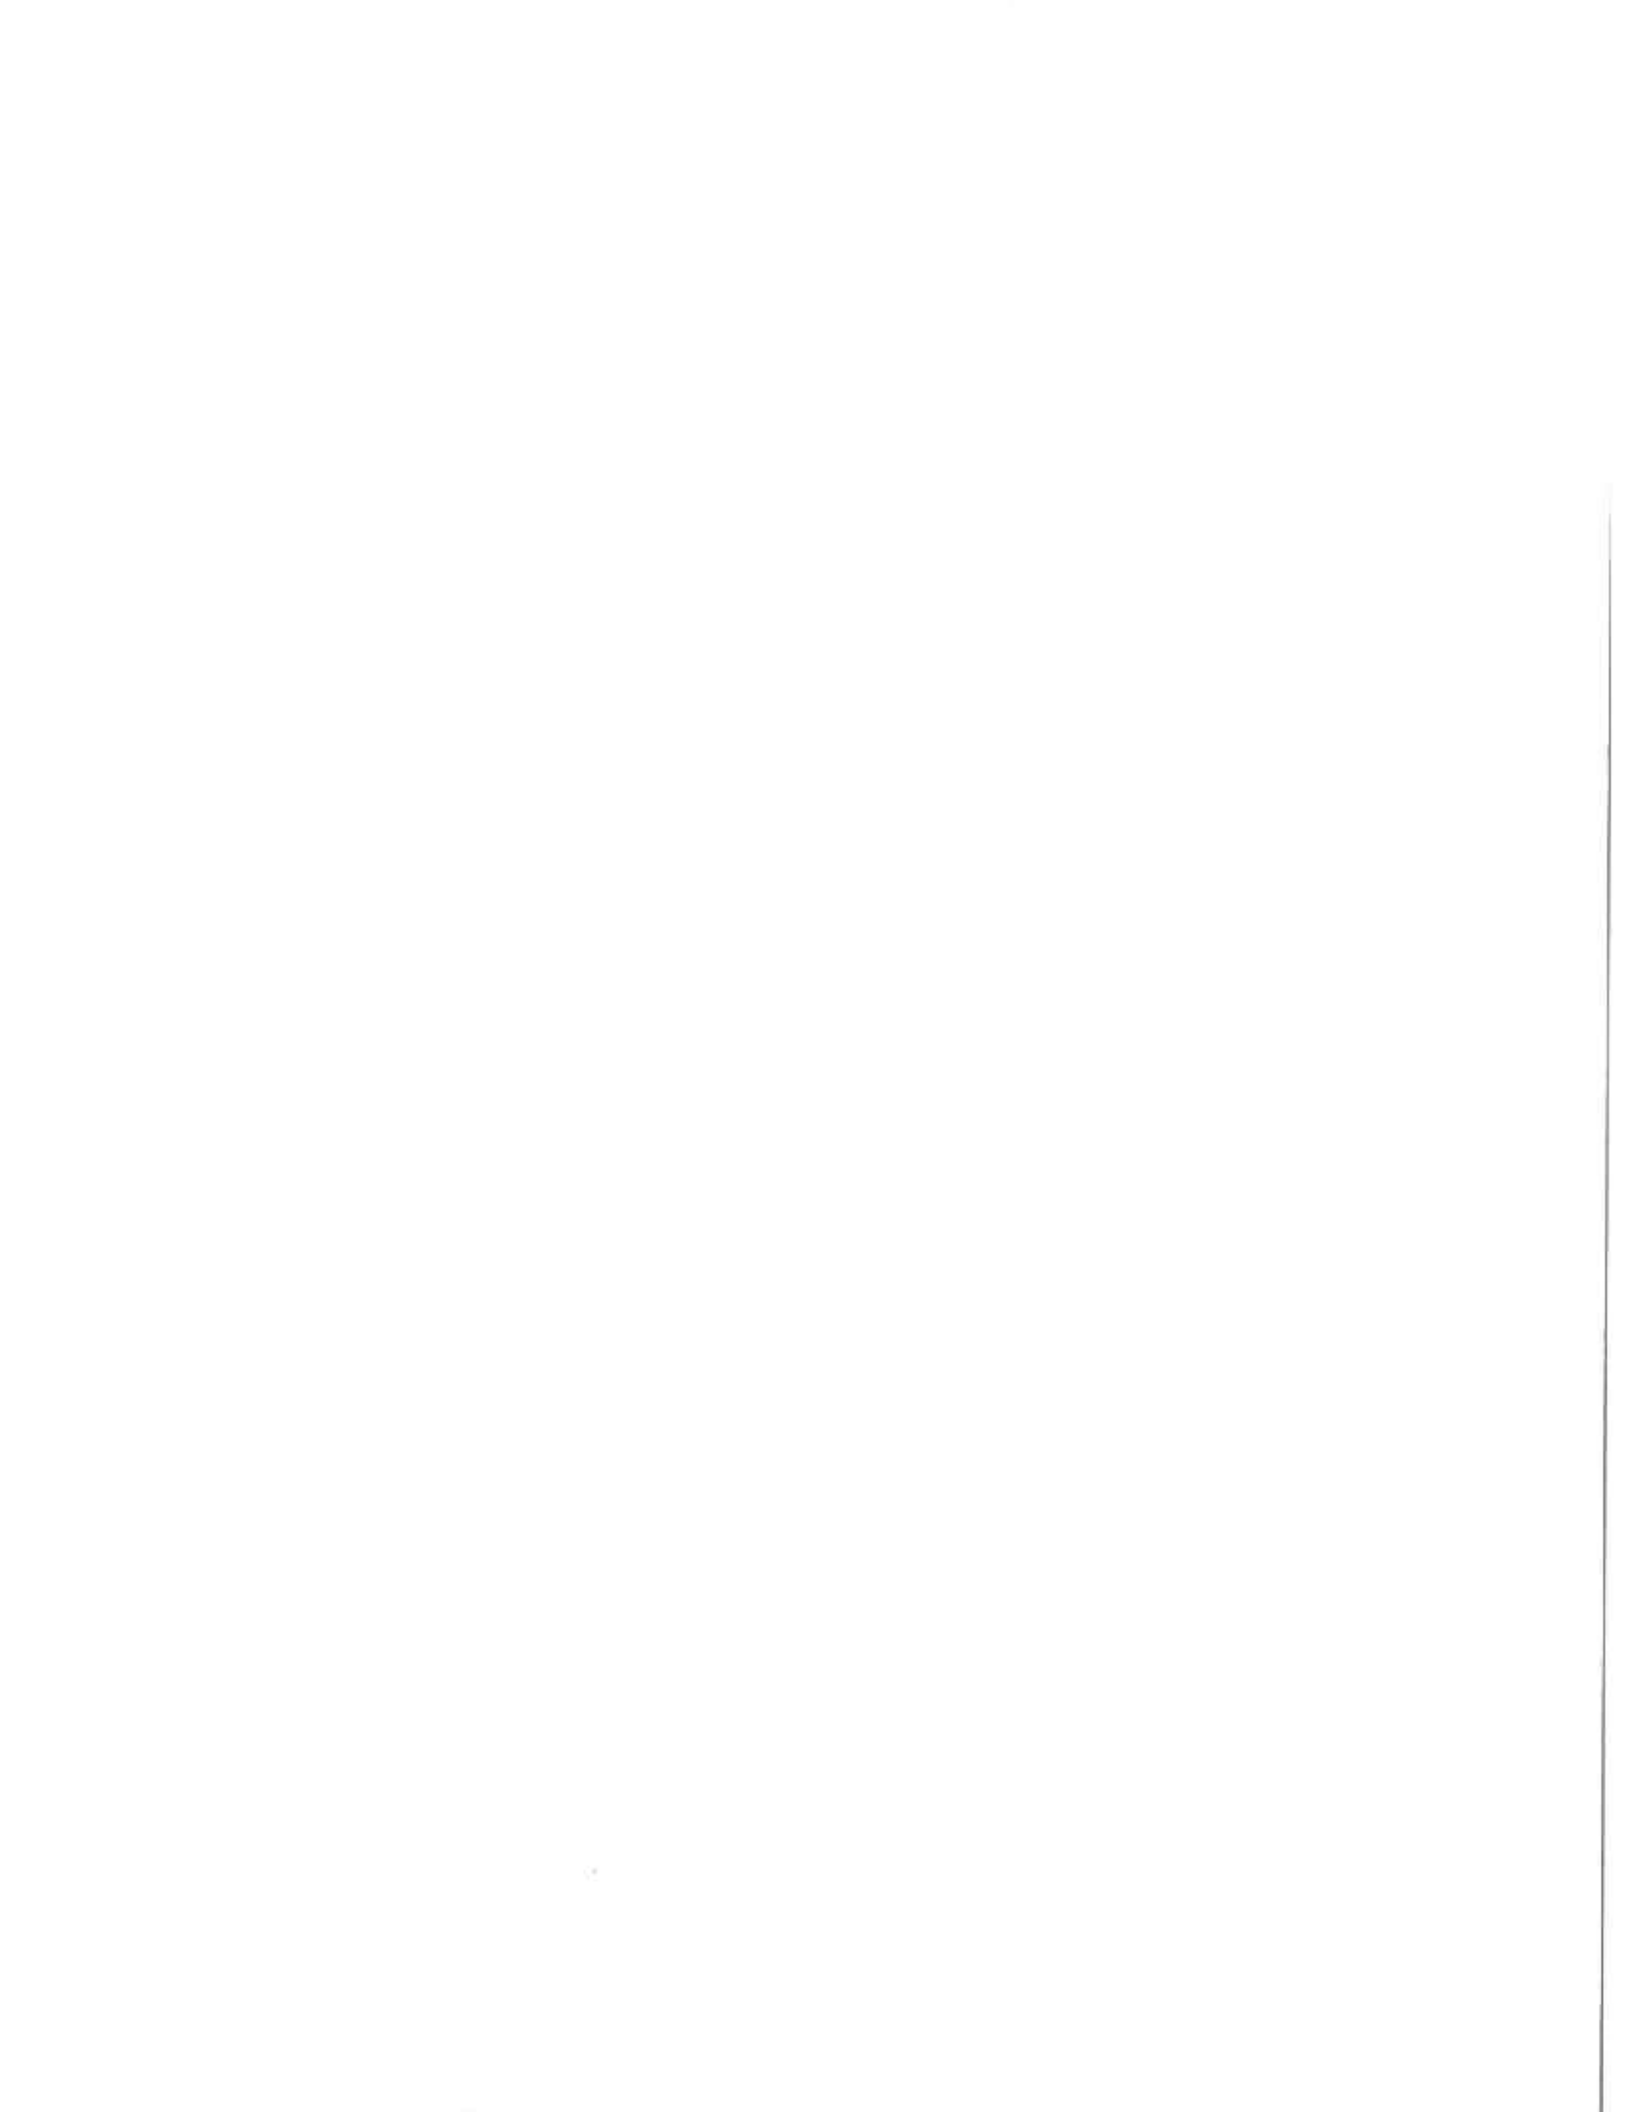

#### DUAL HEAD, COMPACT DESIGN FOR SHORT-TERM TRAFFIC CONTROL NEEDS.

The PTL 2.4LD (Light Duty) model is ideal for daily setup to be used in lieu of flag-persons. It is capable of operating 24 hours a day for up to 7 days, before having to charge the batteries.
